## Animal Memory Game

Many different types of animals have lived in Oregon, from mammoths to giant ground sloths and even camels! Use the museum prehistoric animal cards to play a matching or memory game. For an added challenge, try to figure out which animals were meat eaters, and which were plant eaters.

### You'll need:

- Game pieces printed on heavy weight paper
- Scissors

### What to do:

1. Cut out the pieces along the lines. This is a good chance for children to practice using scissors.
2. Use the pieces to play matching and memory games. Can you find the matches? If your child is very young, simply lay them all face up and let your child find the ones that match.
