Habitat Craft

Start by coloring in the forest habitat and then help the animals find their homes! Who lives in the water and who lives in the tree?

You'll need:

- Crayons or colored pencils
- Scissors
- Coloring page
- Optional: glue

What to do:

1. Color in the habitat.
2. Cut out the animals around the dashed lines.
3. Place the animals in their homes.
4. Optional: glue the animals in place.

Extension:

Get creative and draw a different type of habitat like a desert or mountain and some animals that make their homes there.
