Paper Cup Phone

With this simple activity, you can explore how sound can travel across a string.

You'll need:

- Two paper cups
- Yarn or string
- Scissors

What to do:

1. Poke a hole in the end of each paper cup with the scissors.
2. Feed the sting through the hole and tie a knot. Repeat in the second cup.
3. Pull the string tight and have one person talk into a cup while the other listens with the other cup. "Can you hear me?"
